MCN ANNUAL MEETING - OCTOBER 2019, LISBON

Associação Mais Cidadania - Portugal

MCN annual meeting took place between 23-25 October, in Lisbon, Portugal. With our partners from different organizations, we shared our opinion about different topics, reflected on youth goals and discussed upcoming projects together. In addition, we started to work on MCN booklet to share the best practice of our network, which will be launched next year.

B2B-BOTTLES 2 BOATS

KANE - Greece

The story of the bottles2boats project has started with the common grounds of two organisations: K.A.NE. and R.A.D.I.Kal.A. K.A.NE.'s mission is to create structures for the youth and to provide educational and training opportunities. R.A.D.I.Kal.A's (Recycling Awareness Design Innovation Kalamata Association) core idea is to raise awareness about environment and health through involving citizens in waste recycling combined with physical activity. Following the common grounds of both organisations, the D.R.E.A.M. project was born as an Erasmus + short term group EVS project That aims to involve European youth and the participating organisations of the importance and impact that mobility programs and participation in nonformal learning processes can have as well as the need for protection and respect for our natural environment.

YOUTHGOALS

Associação Mais Cidadania - Portugal

The Youth Goals are created by, with and for Youth. They were written with the hearing of thousands of young people spread around Europe via meetings, surveys, think-groups, etc. To better prepare ourselves for this new reality, Associação Mais Cidadania took part in a Training Course in Mollina, Spain, organized by the Consejo de la Juventud de España - The Spanish Youth Council. During one week, we shared with other associations how can we use the Youth Goals, help implement them and improve them even further in the future.

KATZEN KABARET

Youth centre Kotlovnica Kamnik, Slovenia

Katzen Kabaret addresses young creators and educates audiences. The target audience of young people faces unrecognizability, media manipulation, commercialization and lack of a platform for expressing their own ideas. The project provides them with a platform where, through creativity, they can present their worldview, and with a multidisciplinary approach to current events in society.

MCN YOUTH WORKER'S FACT SHEET

Even though our focus is youth, the associations that compose MCN Network have several different paths to reach the goals envisioned regarding that field. Different origins, different countries, different realities, all of that contributes to a rich variety of perspectives, skill sets, and expertise.

In order to better know our strengths and needs, MCN went out to find out the real people that contribute to this project. We shared a form with every partner with questions regarding their collaborators that shed an interesting light into the composition of the MCN group. The result is a diverse and complete team, composed of people of different ages, from different countries, with different educational background. The way we work with youth is very wide and is put into practice with diverse emphasis. Lastly, we shared our interest in improving our knowledge and skillset and gave some hints on the way we prefer to do it. We invite you all to consult the full results of this assessment in our blog!
